-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Claims 2-5, 10 and 16-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/19/05.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6-8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jansson in view of Shapero et al.

Jansson shows a squeezing out device having a storage container 31, roller 11, 12 and spring 24 and support 10. Jansson lacks supporting separate packages. Shapero et al shows a squeeze out device supporting separate packages (figure 10) to dispense a multi compound material. It would have been obvious to one of ordinary skill in the art to have modified the Jansson device supporting separate packages as taught by Shapero et al to dispense a multi compound material.

The Jansson/ Shapero et al device disclose the claimed invention except for the specific material of the support, package and contained material. It would have been an obvious matter of design choice to modify the Jansson/ Shapero et al device support

made of plastic, package made of foil and contained material a rinsing fluid, since such a modification would have involved a mere change in the material structure and contained material of a component dependent upon the desired application. A change in material structure and contained material is generally recognized as being within the level of ordinary skill in the art.

***Allowable Subject Matter***

Claims 9 and 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bond, Wilson, Pearson and Kawase et al were cited to show further examples of squeeze out devices.
